

13.3.2026

Class 11

This week we have been looking at the festival of Holi and the link to Hinduism and Springtime. We made colourful prints and explored colourful patterns using milk and soap and food colouring, we were amazed to see the reactions. We went on a Holi treasure hunt and did our own shadow colour run, it was so much fun. We have been exploring melting ice with warm water and watching the changing size and shape. In cooking Mrs Johnson was really pleased with how well everyone listened and joined in with sandwich making. In music we have been following a beat and using our body to make lots of different sounds. In zones of regulation lessons we have been thinking about bear and his feelings and seeing which character from books have the same feelings as him and talking about what zones they are in. It was so lovely to see so many parents at parents evening to share the exciting things we have been doing and celebrate the successes , thank you all for all of your continued support.
