## Literacy

This week we continued our work on "The Wind in the Willows". We looked at the character Mr Toad and learned facts about toads. We also learned about how toads grow from an egg through the different stages to become a toad. Children created their own life cycle using different materials.

## Numeracy

This week we have continued our work on Measure, and we are now focusing on Mass and Volume. We have been learning to use the vocabulary heavy, light, full, and empty. Children have been learning to:

- Measure and compare mass using grams
- Measure mass using cubes and balance scales
- Measure and compare capacity

## Topic

This week, we began our new topic, "Green Fingers". For our entry point, the children each made a 'grass head'. They followed instructions to plant grass seeds in soil and create a face for their plant pot. Over the next few weeks we will look after them and observe what happens as they grow.

## Storytime

This week we have been reading 'Supertato: Veggies Assemble' by Sue Hendra and Paul Linnet.
