

Topic

This week the children have started our new topic, Bright Sparks. This topic is a science based topic centred on electricity. The children will learn about electrical safety, how electricity is produced and transported. The children will then create their own electrical project, creating either a torch, lamp or small room. This week the children have learned how to be safe with electricity and have explained what they already know about electricity

Numeracy

This week in Numeracy the children have started to measure temperature. We have been learning to describe temperatures while matching them to the temperature readings. The have also been measuring temperatures in different states.

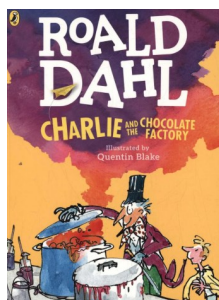

Literacy

This week in Literacy the children have continued reading Charlie and the Chocolate Factory by Roald Dahl. This week the children have been recapping their understanding of the story. The children have been using technology to write summaries and sequence the events of the story so far. Next week the children will complete the story by reviewing the story and providing their own opinions.

Story Time

This week the children have continued to listen to Charlie and the Chocolate Factory.

P.E is on Mondays and Fridays.

Homework is Reading, Spellings and Numeracy.

Have a Great Weekend
