

# Class 12

23.5.25

## Literacy

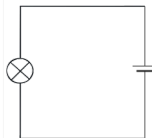

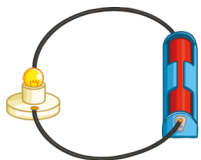

We have finished reading George's Marvellous Medicine in Literacy. The children were shocked at the ending when Grandma shrank so much she disappeared! We have been recognising nouns and adjectives from the story and writing sentences using 'because'. The children also completed book reviews.

## Numeracy

This week in Numeracy Class 12 have been looking at fractions. We have either been working on halves, quarters or thirds. The children have been finding fractions of shapes, objects and numbers.

## Topic

This week in Topic we have continued our work on circuits. The children have been learning about symbols and how to draw

circuits they have made using

symbols to represent the different components. The adults were very impressed with the complex circuits being constructed!

## P.E.

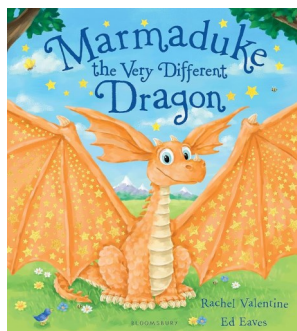

This Half Term in P.E. we have been learning about shape in Gymnastics. The children have been working hard on their static shapes and making shapes in the air. To finish our learning, the children designed and performed their own routines combining this learning with their previous Gymnastics work on movement from the Autumn Term. We have uploaded videos of our performances onto our Class page on the website!

### Story Time

In Story Time this week, Class 12 have been reading Marmaduke the Very Different Dragon.

We have been talking about what makes each of us different and why that makes us special.

Don't forget!

**Monday 2nd June:** Children return to school

**Friday 6th June:** Sports Day
