

Class 2 News

This week Class 2 have been busy designing and building linked to our Going Places topic. In RE we have been learning about different kinds of homes around the world and in topic have been creating models using recyclables and kits to make rockets and space homes.

We have been using our drawing, colouring and collaging skills to help us plan and record our ideas. We have also enjoyed some space themed stories and information books to help us find out more and enjoyed sharing stories we know.

In Numeracy we have been learning about the days of the week and practicing our counting skills investigating doubles on the moon. We have been trying hard to count carefully and count on from small groups we can recognise without counting!

Great work Class 2, have a fantastic weekend. Love, Mrs Shannon and the Class 2 team x
