

2025  
2025

In Literacy this week we have continued with our book, we have made wanted posters, sequenced events, described characters and had excellent discussions around the plot.

The children have been fabulous at sharing ideas and listening to others' opinions

In Maths this week we have been learning about statistics, we have put information into tables, used tallies,

pictograms, bar charts and line graphs!

Some of the children have really enjoyed music this week with their link classes and in the hub, learning new instruments.

Others have had fun in PE practising for sport's day! Year 5 have continued with their swimming lessons and are making great progress.

In Science this week we enjoyed making slime. We talked about the three states of matter and how these can have a chemical reaction. We discussed whether the change was reversible or non reversible. The children made excellent observations and asked great questions.
