

Topic

This week the children have continued our How Humans Work topic and have been learning about the heart. The children used the VR headsets to learn about the function of the heart and to visualise what the heart does in our body. The children then created their own heart model and exercised to see how our heart reacts. Next week the children will be learning about the digestive system.

Numeracy

This week the children have continued their focus on Place Value. The children have been using technology to partition numbers and to represent numbers.

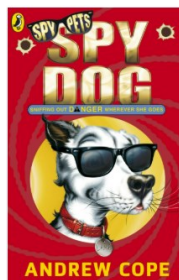

Literacy

This week in Literacy the children have continued to learn about shape poetry. This week the children have used their senses to explore pumpkins. The children then created a word bank that they could then use in their shape poem. The children loved exploring the pumpkins and wrote some excellent poems, with some children including alliteration. Next week the children will be focusing on the myth Theseus and the Minotaur.

Story Time

This week the children have been listening to Spy Dog by Andrew Cope.

P.E is on Mondays and Fridays.

Home work is Reading, Spellings or CVC words and Literacy

Have a weekend
