Welcome

Hello and welcome back to a new term at the Hub!

As we eagerly wait for the beautiful signs of Spring, we have been learning and using the sign for **Spring**.

The children returned to school happily and with lots of experiences to share with their friends. It was lovely to see and hear the children chatting and interacting with each other. This week, we celebrated George, and how he successfully engaged in a whole school assembly and joined in with P.E, with his link class. Well done, George!

In Maths, some children have been recapping measuring using non-standard measure, before moving to measuring using centimetres. This was supported with the vocabulary long, longer, longest and short, shorter and shortest. While Avery explored finding the difference between.

In Phonics, the children are now confidently reading on sight to improve their fluency, while the year 1s continue to learn, remember and use a growing range of digraphs.

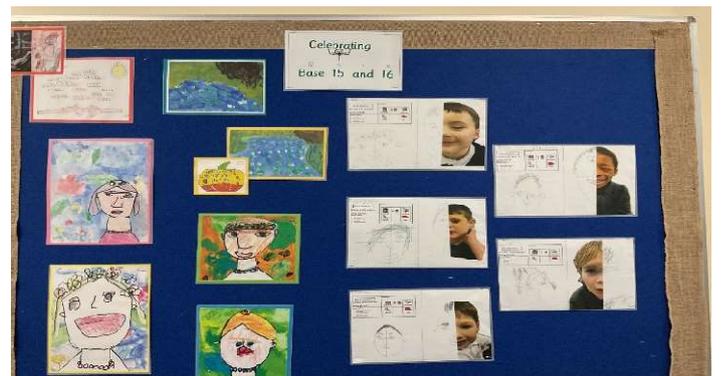

While Zachary, asked to practise ordering his alphabet by using the letter names and then identifying letters by their sound, well done Zachary.

This week in Art, the children have continued to apply their growing knowledge of primary & secondary colours, shape, patterns, and lines through the work of Kandinsky. First, they worked collaboratively to discuss and identify the key features of his work. Then, they chose and used a range of media to create and show their own interpretations, in the style of Kandinsky.

All our amazing work is now proudly on display!

This term, the year 2s begin their Forest school rotation. They are going to work in a cross-curricular way, by linking the shape of our local environment in Geography, and then link this to their learning in History, as they explore how our local environment has changed over time. The rich history of mining in the local area/ and the 'Cinderloo Uprising.' provides a fabulous learning opportunity. The year 1s have also joined in with this learning as they have begun to identify the key features of a map before making a 3D map of our school and local environment.

Finally, we enjoyed this week's music session with Emily! We sang, signed and moved to the beat using the big stretchy band!! A good time was had by all!

Don't forget  
parents'  
evening!

Thank you to everyone for booking a slot for parents evening on Tuesday 3<sup>rd</sup> March. We have lots of amazing work to share with you. Please check your child's bag for your appointment slip and time.

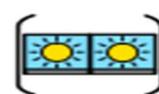

Have

a

fabulous

weekend!
