

Topic

This week the children have continued our topic Lets Plant It. This week the children have been learning what conditions plants need to germinate and grow healthily. The children have then set up an experiment that will last for the next few weeks. The children have placed a seed in the shade, a seed with no water, and a seed with no warmth. They have also placed a seed in a position with all of these things. We will them observe what happens to the seeds over the next few weeks. Next week the children will be learning about the parts of plants and their functions.

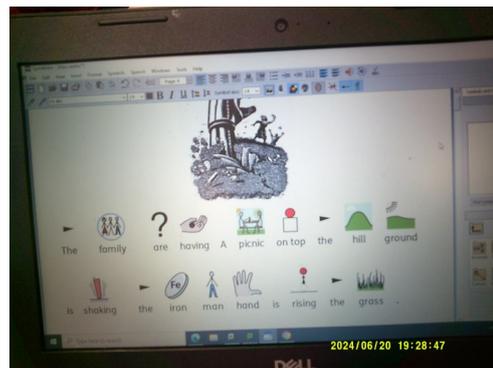

Numeracy

This week in Numeracy the children have been focusing on multiplication and division. Some of the children have been using cubes and pictures to count in twos, make equal groups and to count and divide in threes. This focus will continue next week.

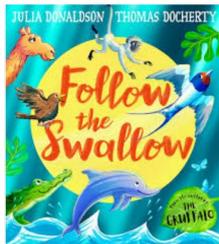

Literacy

This week in Literacy the children have continued our focus on the Iron man story. This week the children have been using the Symwriter program to write descriptive sentences using adjectives, nouns, verbs and adverbs. We will continue this story next week.

Story Time

This week in story time the children have been listening to Follow the Swallow by Julia Donaldson.

Have a great weekend.

Have a great weekend
