

Topic

This week the children have continued our topic Treasure. The children have started to create their own treasure by designing and making their own jewellery. The children used different Egyptian treasure as a stimulus for their own ideas and then used clay to make their treasure. The children also visited Shrewsbury Museum on Thursday and explored the Roman area, the Medieval area and then the historical Shropshire area. The children were all fantastic and were very enthusiastic when they were discovering the different treasures and artefacts. This will be helping us to create our very own museum for our shared learning at the end of the term.

Treasure Island

This week the children have continued our Treasure Island story. The children have used the computer program Symwriter to retell the story so far. The children have also taken part in a shared reading session answering questions about the story they are listening to.

Have a great Weekend
