

Topic

This week in topic the children have continued our new topic Land, Sea, Sky. The children have been learning about different habitats, creatures and life cycles so far. This week the children have been learning about the water cycle. The children have been learning to use and understand the terms precipitation, collection, evaporation and condensation. The children then used the VR headsets to see this in action, they then created their own water cycle art work finalising the lesson with the children making the own water cycle in a bag. Next week the children will be learning about global warming and how we can improve and defend habitats.

Numeracy

This week the children have started to learn about temperature. The children have been learning to describe temperature and to match their descriptions to measures. The children then measured and compared temperatures from around the school.

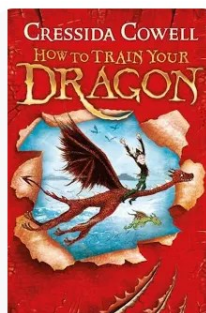

Literacy

This week in Literacy the children have been watching the film narrative The Night Zoo Keeper. The children have created and described their own characters and settings. They then used story mountains to plan their own narrative before using the Symwriter program to write their own story. This focus on the Night Zookeeper will continue next week.

Story Time

This week in story time the children have been listening to How to Train your Dragon by Cressida Cowell.

Thank you everyone.

Have a great weekend.
