

Dragonflies 2.10.26

This week we have been thinking about recycling in dragonflies class. We have been thinking about reusing and recycling. We looked at the different coloured household bins used locally and what they are used for and sorted some rubbish. We made a junk wall to reuse some rubbish and used recycled containers in our water and sand play. We have been splatting our sound buttons in phonics and having lots of fun in outdoor school. In our topic lessons we have been learning lots of new signs for different types of weather and making lots of things fly in the wind.
